

Academic Letter of Recommendation for Student

Thursday – 05 May 2016
Computer Science Department
For Computing studies

Universität Passau- Innstraße41, D-94032, Passau – Deutschland

Dear University of Passau

I hereby recommend the student Laercio Pioli Junior, majoring in program Computer Science from the Federal University of Juiz de Fora to participate in the exchange program at the University of Passau. I have known Laercio Pioli Junior since 2012, and was his teacher in the Database and Datawarehouse subjects. During this interaction it was notorious his dedication and his great interest in acquiring knowledge of the world of computing, in particular data manipulation. Currently I am advisor of his graduation work. In the said paper we are using techniques of analysis of complex networks to identify communities and dissemination of information.

In addition to the mentioned activities, the student served as a fellow at the Regional Center for Innovation and Technology Transfer, an institutional department of Juiz de Fora Federal University. The center is focused on the transfer of technology and innovative solutions and consists of new companies seeking advice for development of new products or process improvement. He is currently a fellow of the Organizational Knowledge Management Center of the Federal University of Juiz de Fora, an institutional department for advanced implementation of information technology for security, automation, rationalization and streamlining of university management processes, which in their practices involve research, analysis, modeling, development and managing TI services.

Having said that, I strongly recommend the student Laercio Pioli Junior to Passau University, given his already acquired knowledge, his dedication and commitment, and determination to advance the studies on the ample computer Science field.

Best regards
Victor Ströele
